Summary

Motivated and passionate Frontend / Full-Stack Developer with 1 month of internship experience and 6 months of hands-on training in building responsive, user-focused web applications. Skilled in modern technologies such as HTML, CSS, JavaScript, React, and Node.js. Known for quick learning, attention to detail, and strong problem-solving abilities. Eager to contribute to real-world projects, collaborate with experienced teams, and grow into a professional software engineer.

Skills

Frontend: React Native, React.js, JavaScript, TailwindCSS, HTML5, CSS3, Web Performance Optimisation

Backend: Node.js, Express.js, MongoDB

Tools: Redux ,Git, GitHub, VS Code, Postman

Professional Experience

Full Stack Intern

November 2025-Current

Quest Digiflex Private Limited, Indore

- Added a new **logistics and region-management module** to an existing delivery application using **React** and **Tailwind CSS**, ensuring smooth UI integration across Branch, Route, Area, and Village workflows.
- Integrated **REST APIs** for real-time data retrieval and updates, improving system performance, data accuracy, and overall user experience.
- Built responsive dashboards and reusable components to enhance scalability, maintainability, and overall frontend performance.

Projects

Crypto App:

- A secure and user-friendly crypto application featuring an integrated dashboard to buy, sell, and manage portfolios in real time.
- Includes live price updates, search functionality, and a basic chart view for quick insights and better decision-making.

DailyBite App:

- An application designed to help users manage their health goals and lifestyle by ordering personalized daily meals—making healthy eating simple, smart, and sustainable.
- Implemented user authentication, CRUD operations, and RESTful APIs to support secure and efficient app functionality.

Weather App:

- A sleek and accurate weather app providing real-time forecasts, temperature updates, alerts, and hourly/weekly reports through an easy-to-use dashboard.
- Built using Fetch API with conditional rendering and a clean, intuitive UI for a smooth user experience.
