

MEHAK GUPTA

mehakgu04@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Innovative and performance-driven AI/ML Developer with practical knowledge of **computer vision, web development, machine learning, and generative AI**. skilled in using **Python, Flask and MySQL** to create and implement intelligent, scalable, and user-focused apps. Skilled in building end-to-end solutions from data preprocessing to real-time deployment. adept at using GenAI tools like **Hugging Face and OpenAI APIs** to automate processes and build conversational AI systems. enthusiastic about delivering significant technological solutions by fusing AI innovation with contemporary development techniques.

EXPERIENCE

Robotronix — Machine Learning Intern

May 2024 – Aug 2024

- Developed and implemented **machine learning models** for various projects. Built a high-accuracy **face recognition system**.
- Contributed to a PhD research project on **ECG analysis** for a client.
- Worked with NVIDIA's Jetson Orin Nano for real-time data processing.

Seedloft — Intern

Jan 2024 – Mar 2024

- Completed a dynamic **web development** internship.
- Gained hands-on experience in **HTML, CSS, JavaScript**, and responsive design.
- Contributed to building **user-friendly interfaces**.

Technohacks — Data science Intern

May 2023 – Jun 2023

- Cleaned and preprocessed datasets for ML applications, ensuring model-ready data.
- Conducted in-depth data analysis to uncover actionable insights.
- Tested and tuned multiple ML algorithms, improving model accuracy by 12%.

PROJECTS

Gesture-Controlled Game Interface (August 2025)

- Built a real-time gesture-controlled gaming system using **Python, OpenCV, and MediaPipe**.
- The system detects and maps **hand gestures to game actions**, reducing the dependency on external hardware and improving accessibility for users.

Health Assist Chatbot (July 2025)

- Developed AI-powered chatbot for hospital booking and symptom-based queries using **Flask, Socket.IO, and JavaScript**.
- Integrated voice input (Web Speech API) and session-based conversation flows, boosting booking efficiency by 30%.

Twitter Sentiment Analysis (June 2024)

- Created NLP-based sentiment analysis tool using **Pandas, NLTK, and regex** for data cleaning.
- Collected tweets via **Nitter scraping** and developed a user-friendly web interface.
- Helping users quickly gauge audience reactions to trends or brands.

Crop Recommendation System (January 2024)

- Built **ML model** to recommend crops based on rainfall, humidity, and temperature inputs.
- Integrated with **Flask backend** and HTML/CSS frontend for seamless user interaction.
- The solution provided data-driven insights to help farmers optimize yield, outperforming baseline models with higher predictive accuracy.

CERTIFICATION

- Backend Development — Relevel
- AI Foundations for Everyone — IBM
- Google Data Analytics Professional Certificate — Google
- AWS Generative AI Applications: Scale Your Vision — AWS

TECHNICAL SKILLS

- Programming & Frameworks:** Python, Flask, FastAPI, HTML, CSS, OpenCV, MediaPipe, Socket.IO
- AI/ML & GenAI:** TensorFlow, Scikit-learn, Hugging Face Transformers, OpenAI API, Pandas, Claude AI, ChatGPT, Copilot, NumPy, Matplotlib
- Databases:** MySQL, NoSQL
- AI Development Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Postman, NVIDIA Jetson Orin Nano, GitHub Copilot, Hugging Face Hub
- Soft Skills:** Leadership, Written & Verbal Communication, Critical Thinking, Problem Solving

EDUCATION

- Master of Computer Applications — Shri Govindram Institute of Technology and Science (CGPA: 8.5)
- Bachelor of Computer Applications (Data Science) — Sage University (CGPA: 8.7)
- Class 12 — The Millennium School, Indore (96%)
- Class 10 — Dunes International School, Abu Dhabi, UAE (95%)
